

Are you great at effectively delivering and monitoring renewable energy in buildings?

Are you representing a commissioning authority, ESCO, engineering consultancy or facility manager?

Connect and exchange on the STUNNING Knowledge Sharing Platform with European stakeholders along the construction value chain and share knowledge on energy-efficient building refurbishment packages:

- Find examples of energy management in energy-efficient renovated public and residential buildings, as well as benchmark information
- Search for business cases with a strong replication potential
- Advertise your services
- Share your monitoring results in open data formats
- Share your own good practices and lessons learnt

Adaptable technologies for deep refurbishment

+

Methodologies for design and implementation

+

Business models to increase the renovation rate up to 3% by 2020
