

Searching for opportunities to integrate energy-efficient solutions in existing buildings?

Do you represent a company providing technical solutions and materials for energy-efficient buildings?

Connect and exchange on the STUNNING Knowledge Sharing Platform with European stakeholders along the construction value chain and share knowledge on energy-efficient building refurbishment packages:

- Find information on costs, materials and labour
- Browse through analyses of implementation constraints
- Find examples of business cases
- Advertise your products and services
- Take advantage of the STUNNING Knowledge Sharing Platform through networking with new business contacts and potential customers

Adaptable technologies for deep refurbishment

+

Methodologies for design and implementation

+

Business models to increase the renovation rate up to 3% by 2020
